Based in the Jura in "Plastic Valley" since 1923, Meynier & Fils specialises in the manufacture of buttons, buckles, components for jewellery, perfume stoppers and upscale packaging components.

It stands out for its strong industrial expertise, from chemistry to the creation of materials for machining, injection moulding and dyeing for product realisation.

All stages of production, from concept design to finishing, are carried internally and are highly integrated.

Expert in processing of resins, Meynier offers innovative solutions, research and specific colours to meet the demands of designers.

Regular investment has helped turn it into an efficient and diversified production facility.

A culture of quality and precision has given it the opportunity of working with the biggest names in fashion and luxury.

Over the years a gift for feeling out current trends means it has been able to bring out collections of fashion accessory items twice yearly.
