Founded in 2004, Lejeusne specialises in printing and stamping.

It produces, among other items, headed paper, business cards, greetings cards, invitations and envelope labels. Relief stamping is carried out using a hand press known as a die stamp. This tool is also used for the cutting-out process. The firm has two die-stamping presses dating back to the first half of the 20th century. It also uses between 8 and 10 000 dies in its production. Greetings cards and notelets are distributed across Paris from three sales outlets (two boutiques and the company's workshop).
