This traditional, family firm is specialised in making made-to-measure men's shoes and riding boots. It makes luxury shoes and a collection of ready-to-wear models.

It is an expert in the "Goodyear" technique, whereby a link between the upper and the insole is formed by invisible stitching.

All models have veritable "Goodyear" stitching. The techniques of cutting, shaping and finishing are traditional and done by hand. All manufacturing steps are carried out in the workshop.

The company has ancient manual tools and also has a collection of wooden shoe-trees dating from 1910 to modern day.
