Founded in 1986 the company is specialised in making high-end, made-to-measure riding saddles. It also sells second-hand saddles, after checking different safety and quality aspects, and makes a few accessories (straps, rugs, etc.).

The company's rare know-how concerns the traditional manufacture of riding saddles. The company makes made-to-measure items. It carries out technical research and product adaptation, without sacrificing the line and look of the saddles to modernisation.

The clientele consists mainly of private customers, along with a few institutions. Thanks to the range offered, the company is present in all Olympic riding disciplines.
