The family company founded in 1973 by Pierre Versace (Master Craftsman) makes and sells enamelled lava worktops (kitchen and bathroom work surfaces, orientation tables, shop fronts, etc.), hand-made enamelled terracotta tiles and enamelled sandstone sinks and basins. The workshop perpetuates traditional, manual manufacturing processes: tiles and bathroom articles are shaped with dies. Thanks to this traditional technique, it is possible to import any shape of tiles and also to offer corner pieces in the same shape as the tile, thus avoiding any unsightly cutting and ensuring a perfect result. All work is done to order and tailor-made according to customers' requirements. All hand-painted decorations are personalised in accordance with the customer. Parts made by the company can be easily incorporated into local, contemporary or modern designs. The company takes part in different trade fairs in the region: Nice International Fair, Decoration Fair in Cagnes Sur Mer, Nice Artisanat. Products

are sold directly on site and can be exported.
