Created in 1965, the Ateliers Chollet Frères specialise in traditional joinery, in particular for rehabilitation and renovation projects.

They manufacture and restore stairs, traditional parquet floorings, along with mouldings and large-frame doors for old apartments. The company is able to work on very complex projects. It possesses several qualifications, in particular an historical monument restoration accreditation. It has demonstrated its know-how on many occasions at protected or listed sites: Versailles National Domain, Royal Palace, etc. Ateliers Chollet Frères work exclusively to specific order and through invitations to tender.
