Installed for 3 generations in the Jura region, Tableterie Jacquemin specialises in the manufacture of fancy wood articles and caskets.

Numerous types of products can be made to measure, in quantities ranging from several pieces to series of several hundreds (caskets, display units, office articles, decorative objects, fancy tableware, etc.). The workshop's production processes are based on the machining (traditional or digital), assembly and finishing techniques of the fancy wood articles trade.

Apart from its up-to-the-minute knowledge of fancy woodwork techniques, the company complements its initial range of services with types of know-how that enable it to meet specific needs: veneering, sheathing, lacquering, varnishing, hot marking, etc. Tableterie Jacquemin works

exclusively to order. Its products are distributed in France and abroad.
