BRETAGNE

<http://enp-agencement.com/>

The ENP Agencements workshop is a company whose know-how ensures excellence in cabinet making. It has been working in close cooperation with the greatest names in interior design for many years.

This company gives the highest importance to the quality of its products. This is notably why it carries out the various production steps itself: selecting wood from French and European forests (solid woods and veneers), producing detailed plans, applying cabinet-making techniques, product finishing (sanding, brushing, tints and varnishes), delivery and installation on site.

Its unique know-how can be seen in the consistency between these different steps.

It has become a specialist in developing new finishes and today offers its customers and architects the possibility to develop unique finishes for each project.

Each piece produced is unique and custom-made for the architect's needs.
