Founded in 1903, the company specialises in mosaic work.

It works with Venetian enamels, gold and marble, and restores contemporary heritage buildings. In the context of its work, the workshop has gathered archives dating back to 1903 concerning the construction and restoration of many monuments that it has produced since its creation and uses a gold and sandstone dating from the early 20th century.

Michel Patrizio is recognized for the quality and originality of his decors. He has restored many listed monuments in France and abroad. The company works exclusively to specific order.

It works for individuals, companies and public prescribers.
