Ateliers de Verneuil-en-Halatte specialises in the design, industrialisation and manufacturing of leather goods. It retains the traditional and artisanal crafts by restricting production to a certain volume and through innovation.

Their expertise is based on rare know-how, such as bag turning, flat and volume editing, quilting and braiding chains.

Finally, it shows commitment to the transmission of know-how both for current staff and for students from other schools.

The Workshops of Verneuil-en-Halatte contribute to the France's international reputation.
