Founded in 1875, the family firm S.A.E.E Pierre Mouret is specialised in making and restoring luxury, period lighting. It makes prototypes and unique items for decorators and interior designers in France and abroad. The company has a collection of several contemporary and ancient models that it adapts in accordance with customers' demands.

Using matrices, machines, models and documents dating from the company's origins, Pierre Mouret can re-issue old models and also create new lines that are inspired by the past. Ironworking, hammer beating, metal decoration (gilding, traditional patina), chasing and bronze mounting are all performed using traditional methods.

Restoration operations are carried out to specific order only. As for S.A.E.E Pierre Mouret creations, they are sold by the company itself or by retailers specialised in luxury decoration.
