Located in Aveyron since 1973, the company is specialised in making bespoke matching interior doors and cupboards in laminated solid wood.

The raw material used comes from PEFC-labelled woods (oak, beech, fir).

The commitment of the company's skilled employees combined with the creativity of an industrial designer allows the company to make high-end doors in classic or contemporary styles, suitable for new or renovation projects.

Every day, Rozière provides the best of its know-how to make each door unique and to enhance interiors.
