Created in 1970, the Basque furniture workshop Jean-Claude Ayçaguer specialises in the restoration of antique furniture. The workshop demonstrates the highest level of expertise and excellence. It handles all the stages in the restoration process: diagnosis of the works to be restored, drafting of reports, restoration and finishing. It respects the principles of reversibility and maximum conservation; it implements contemporary techniques. It is distinguished by the mastery of complex operations: curved shapes, veneers, removal and resetting of marquetry, shellac finishes, varnishing with buffer.

The clientele is mainly composed of institutions (DRAC, town halls), with private customers generating a quarter of orders. Prestigious private references include the expert assessment of furniture at the "Maison Louis XVI" in St Jean-de-Luz.
