Based in Faubourg St Antoine since 1978, Bouin-Gardon offers gilding services for interiors (panelling, ceilings, etc.), exteriors (facades, railings, etc.) as well as the restoration and creation of decorative panels in the workshop.

This family workshop (2nd generation) possesses a rare expertise in gilding on any medium (wood, glass, metals, concrete, etc.), giving it a strong reputation with its established clientele.

It has worked on listed heritage buildings, on estampille furniture and other prestigious projects, notably for luxury boutiques. The company does restoration work for museums, public monuments and private buildings.

It is regularly contracted by Living Heritage Companies (EPVs).
