Les Maquettistes Réunis de Suresnes make models and prototypes: perfume bottles, cases for cosmetics, scale model ships, etc.

The workshop has an uncommon level of expertise based on its high-quality skills in all manufacturing techniques: design and fabrication of silicone moulds with polyurethane resin casting, manual machining, painting and decoration and installation.

It produces full-size or scale models or prototypes for its customers. Employing a wide range of materials and techniques, the workshop faithfully reproduces sketches or drawings. Its various technologies are able to shape all materials: wood, plastic, cast resins, steel, precious metals, etc.

The company has an established customer base (Navy Museum, Cherbourg Museum, etc.) and has produced a scale model of civil radar for the Ministry of Foreign Affairs.
