The Ateliers Robert Gohard are specialised in gilding conservation and restoration, and principally work on restoring monuments of great heritage value.

They are internationally renowned and have worked on such prestigious buildings as the Hôtel des Invalides, the Pont Alexandre III and the Place de la Concorde in Paris, the Statue of Liberty in New York, and the dome of the Law Courts in Brussels.

The workshop takes on a range of very different sorts of work. The expertise of their Master Craftsmen means they can gild and restore the gold leaf on all interior objects such as woodwork or furniture, and exterior features such as domes or statues. They can work on a variety of materials, including wood, plasterwork, metal, bronze, lead and copper. Each object and material requires specially adapted techniques.

With their reputation for expertise in traditional 'reparure' techniques, the Ateliers Robert Gohard also has a branch in New York. Gohard Gilding Corp. 23 East 23rd Street – Paterson NJ 07514 Tel: 001 973 523 6100 – Fax: 001 973 523 1450
