## UNIQUE EXPERTISE

For more than 30 years, the Leblon Delienne sculpture workshop has used its expertise in design. Each collection piece is designed as a real work of art by our sculptors. Created in limited series, our creations benefit from an exceptional quality finish and care, which is recognised by the French 'Living Heritage Company' brand.

## 3 UNIVERSES

To embody this passion for fantasy worlds and pop culture, LD has defined 3 universes: Entertainment art, sculptures breathing life into figurines characters, in search of their most faithful expression. The art of living, furniture and accessories inspired by pop culture with a fun and off beat look. Contemporary art, original projects created between artists from entertainment art, urban art and contemporary art.

---

## POP CULTURE FAN

We are a Pop Culture generation, lovers of graphic novels, comics, video games, cinema or TV series heroes, rock music, pop art and urban art, Leblon Delienne draws inspiration from this to create characters, items and furniture in search of meaning.

In line with our initial collaborations with Jeff Koons and Takashi Murakami in partnership with major luxury brands, Leblon Delienne creates original artistic projects between artists from entertainment art and contemporary art.
